

DIDI NURAHMAN

FULLSTACK ENGINEER

PROFESSIONAL SUMMARY

System Analyst and Fullstack Developer with 2+ years of experience managing end-to-end system development — from business requirement analysis and process mapping to Functional Specification Document (FSD) preparation and user acceptance testing. Skilled in ERP system management (ERPNext) and building high-performance web applications using PHP, JavaScript, React, and Laravel, with MySQL database optimization and Android/iOS mobile app maintenance. Passionate about precise system analysis and delivering scalable solutions that align with real business needs.

- Junior Web Developer — Digital Talent Scholarship (Issued Jun 2023) — Credential ID: 1936545860-58
- CCNA: Introduction to Networks — Cisco (Issued Jan 2023)

WORK EXPERIENCE

Full Stack Developer - PT. Textilindo

Oct 2025 – Present

- Analyzed business requirements and implemented integration between the internal ERP system and Indonesia Customs CEISA 4.0, automating Import Declaration (PIB) processes and reducing document preparation time by up to 89%.
- Built an internal recruitment portal integrated with ERPNext, enabling candidates to submit applications directly into the system and replacing the manual process with AI-powered instant assessment, reducing evaluation time by approximately 80%.
- Designed a company profile website tailored to the company's brand identity and theme, leveraging AI design tools (UX Pilot) to accelerate the UX design process and ensure visual consistency.
- Developed an employee onboarding portal serving as a centralized hub for new hires — covering company and subsidiary profiles, vision and mission, standardized feature training, training schedules, and company-wide announcements — integrated with the internal helpdesk system.

Programmer - PT Merry Riana Group

Feb 2024 – Feb 2025

- Managed a sales website (Laravel, CodeIgniter, React.js) including payment gateway integration and a real-time transaction dashboard.
- Developed an event ticketing system covering ticket sales, participant registration, and barcode scanning, complete with an analytics dashboard.
- Designed and built a company profile website, collaborating closely with the graphic design team to determine the best visual and UX direction.
- Maintained Android and iOS applications built with Ionic, collaborating cross-functionally from planning through deployment.
